National SIMPLIFIED CONTROL CAUTERY

with "The Hidden Shelf"

and the "Dual Position" CAUTERY PISTOL

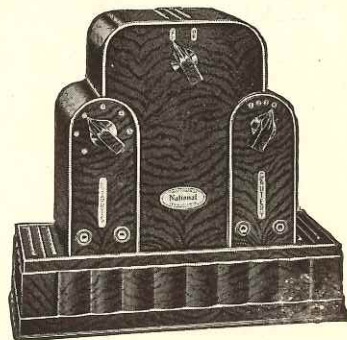

14 Exclusive Features

The NEW National is the most IMPRESSIVE, most COMPLETE cautery ever developed.

The ONLY cautery supplied with the "Gyn-a-lite" vaginal speculum clip set.

NO OTHER CAUTERY so easy to operate.
(Note VISIBILITY of panel markings and SIMPLICITY of controls.)

A larger, sturdier, Heavy-Duty device, that covers every cautery and diagnostic light requirement. BUILT TO LAST A LIFE-TIME.

The ONLY cautery with the "Hidden Shelf"—a compartment for the storage of accessories. No searching for easily mislaid tips, bulbs, etc.

Cauterization assures 85% complete cures of cervical discharges. Considered by most gynecologists the standard treatment in chronic endocervicitis because of simplicity and comparative freedom from complications.

"Dual Position" CAUTERY PISTOL with "Trigger Lock"

- The ONLY cautery handle with reversible positions for cautery electrodes, so that the cutting edges may be used in either vertical or horizontal position.

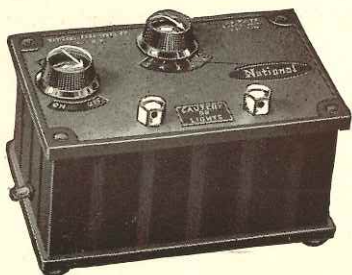

- The ONLY cautery handle with illuminator below the field of vision and entirely out of the line of sight.

- The ONLY cautery handle with TWO-FINGER trigger switch.
- The ONLY cautery handle with the "Trigger Lock" which holds the trigger in the "ON" position when desired, thereby making it unnecessary for the operator to exert pressure to maintain electrical contact.

- The NEW N90 HEAVY DUTY, Simplified Control Cautery Set includes: Transformer with Compartment, Illuminated Cautery Pistol, "Gyn-a-lite" Clip Set, and a choice of three cautery tips. (For 110 Volt, 50-60 cycle A.C.). **\$39.50**

National "SINGLE-CONTROL" CAUTERY SET N45 . . . \$26.50

This single-control cautery includes the exclusive "Dual Position" Cautery Pistol with the "Trigger Lock" and a choice of 3 tips. Transformer case of molded, walnut "Bakelite"—more attractive than any cautery ever offered at this price. Will take care of every possible need the general practitioner or gynecologist may have for office treatment.

National OTOSCOPE and SINGLE-DISC

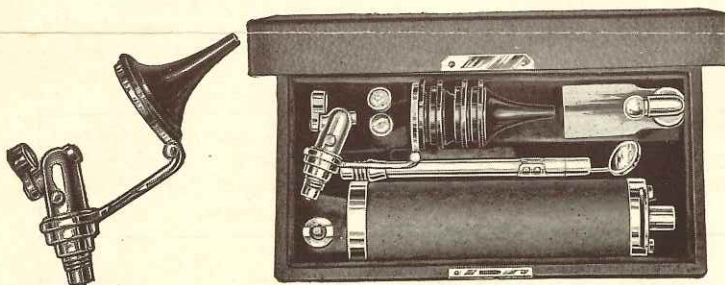

"Neitromald" OPHTHALMOSCOPE SET N 2134 . . \$42.50

INCLUDES: Otoscope (patented) with 4 "Neitromald" specula, single-disc "Neitromald" ophthalmoscope, large battery handle with rheostatic control and binding posts, spare bulbs, in a plush-lined case.

COMPLETE National DIAGNOSTIC SET N 2033 . \$58.50

with Double-Disc "Neitromald" Ophthalmoscope

INCLUDES: Otoscope (patented) with 4 "Neitromald" specula, double-disc "Neitromald" ophthalmoscope, large battery handle, illuminated (patented) tongue depressor holder, "All-Metal" transilluminator, laryngeal mirror and spare bulbs, in attractive, plush-lined case.

Your Guarantee of Satisfaction

See Mueller
1938 Catalog →

The National Otolaryngoscope embodies *exclusive* patented features that result in splendid illumination and eliminate the costly replacement of "special" bulbs. Vision is unobstructed and there is

abundant space for instrumentation. "Neitromald" specula (developed by National) are *guaranteed for life*. These sets incorporate many features found only in instruments of National manufacture.

"Neitromald" OPHTHALMOSCOPE

Note the Exclusive Features

VEST POCKET DARKROOM

For the National Ophthalmoscope.

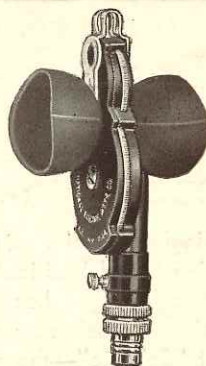

DOUBLE-DISC—unusual range—96 Dioptric values—plus .5 to 70—Minus .5 to 45.

COLOR FILTERS—clear light - daylight - red free - pin point.

PRISM ILLUMINATION—concentrated—no shadow or glare.

ILLUMINATED zero index.

MADE OF "Neitromald"—No plating or oxidizing to wear—lastingly beautiful—light weight.

This ophthalmoscope is the last word in instrument efficiency. It employs numerous innovations found in *no other* ophthalmic diagnostic device.

This indispensable attachment sells for \$2.00 when purchased with a National Ophthalmoscope and \$2.50 when purchased separately.

Slips directly over the "Neitromald" ophthalmoscope at the office or bedside, and excludes ALL EXTRANEIOUS LIGHT RAYS.

Provides darkroom diagnostic efficiency anyplace—anytime. Soft rubber eye-cups conform to all eyes and insure comfort. Eye-cups of varying depths permit a working distance of 1" or 1½" between eyes of patient and operator.

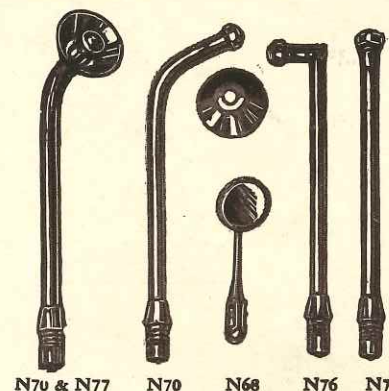

National "ALL-METAL" TRANSILLUMINATORS

Operate on battery or transformer. Hooded bulb—Maximum penetration. Practically unbreakable—Boilable. For hydroceles, breasts, cervixes, sinus, antrum and mastoids.

N68	Laryngeal Mirror (fits over N71)	\$1.00
N70	Curved Transilluminator	4.75
N71	Straight Transilluminator	4.75
N76	Right Angle Transilluminator	4.75
N77	Foster Breast Transilluminator Shield (fits 70, 71, 76)	1.00
N65	Boilable Rubber Cord (7½ ft.)	2.50
	Replacement Bulb 2.5 or 3.8 Volt	1.25

Illustration shows the Dr. G. S. Foster Breast Transilluminating Shield for Breast Tumors, Pus Pocket Formations, Foreign Bodies and Calcification.

National "Gyn-a-lite" Clip

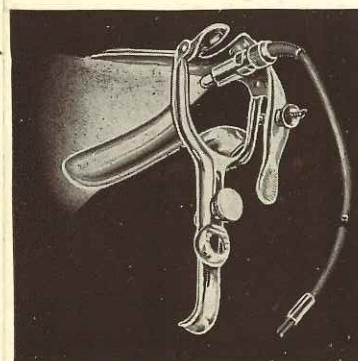

N53 . . . \$3.75

Fastens to any Speculum.

Operates from battery or transformer. Concentrated light. Chromium—Boilable.

Same cord fits all other instruments.

Includes: Boilable cord, "Gyn-a-lite" clip and search-light bulb.

National Battery-Box

NI50 . . . \$7.50

An Attractive Battery Current Controller for Twin Transilluminators, Bronchoscopes and other instruments.

Molded "Bakelite" case 3¼" x 3¼".

Delicate voltage control.

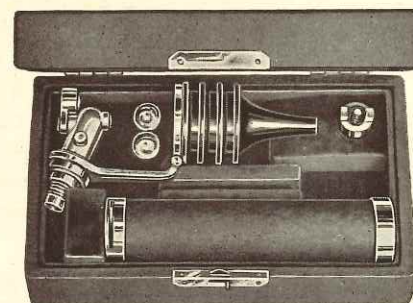

Refills with 4 large, flashlight cells.

Absolutely no danger of shock!

National Otolaryngoscope

SET No. N 25 . . \$21.50

INCLUDES: Otolaryngoscope with four "Neitromald" specula, medium (N 26) battery handle and spare bulbs, in a compact, plush-lined case.

Shock-Proof Controller

N60—\$8.50
110 V-50-60 cycle
(add \$1.00 for 25 cycle)

Operates all diagnostic instruments.

Split plug fits wall outlet or screw socket.

Large control knob permits fine voltage adjustment for delicate bulbs.

Friction posts accept all cord tips—no set screws.

NON-HEATING
ATTRACTIVE
LASTING

TWIN TRANSILLUMINATION by National

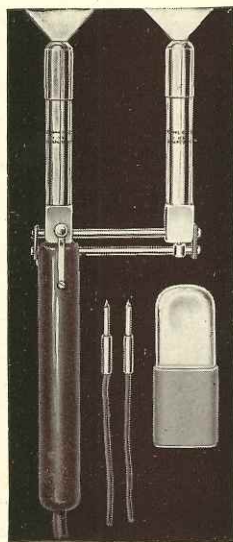

INDISPENSABLE for Accurate Diagnostic Comparison

By DR. L. H. SCHWARTZ

SIMULTANEOUS TRANSILLUMINATION of BOTH Sinuses, Eyeballs, Pupils, etc.

- The ONLY transilluminator assuring real Antrum penetration because of the combined intensity of two lamps, instead of the usual single bulb. (See illustration showing glass sheath over both lights and placed in the mouth.)
- The ONLY instrument showing BOTH — Anterior Chambers, Conjunctivae, Irides, Pupils and Eyeballs, at the same time, for positive study and comparison.
- Light carriers are slidably adjustable to compensate for all variations in facial measurements.
- Employs standard flashlight lamps; no costly "special" bulbs.
- Also excellent for Breast, Mastoid and Hydrocele diagnosis.

National N 80 TWIN TRANSILLUMINATOR, complete with spare bulbs, bulb hoods, glass sheaths, push-button switch and 7 1/2 ft. cord (in a compact box). Operates from standard controllers or battery boxes. \$12.50
